BUSHBOARD

BB omega

inspirational design

committed to innovation

At Bushboard, we like to push the design boundaries when it comes to worksurfaces. That way you can be confident you are choosing a worktop at the forefront of trends. Our Omega range is an exercise in laminate innovation demonstrating the material's vast potential to deliver a lasting design impression.

Omega centres on design and texture combinations that take laminate to a new sensory level. Where the eye and the touch are pleased simultaneously by the way the worksurface looks and by the way it feels.

Recognising the appeal of natural stone in the kitchen, there are beautiful designs inspired by slate, limestone and granite complemented by a subtle, riven texture. Add to that some exotic woodgrains with the luxurious feel of being freshly sanded. Or the reflective surface of polished stone that accentuates the pearlescent flecks within the design. And last but by no means least, the unique introduction of silver metallic worksurfaces that open up a host of design possibilities.

Omega worksurfaces marry design highlights with empathetic surface textures. They are exciting and engaging. They are also a byword for outstanding quality.

Strass Noir worksurface

Ebony Stripwood
worksurface and
upstand

Strass Blanc work surface
and splashback

gorgeous and glamorous

Give your kitchen some full-on glamour with the Strass designs. Available in black or white, their monochromatic appeal is undercut with silver flecks that dance delicately under the light. Add to that the glossy, reflective surface and you have a design reminiscent of polished stone. Expensive looking. And undeniably gorgeous.

Just like other high fashion, high gloss worksurfaces, Strass designs require some TLC to maintain their luxurious looks. So no chopping, cutting or placing hot items directly onto the surface please.

Charcoal Slate
worksurface and splashback

natural beauty

Nostalgic. Timeless. And incredibly fashionable.

That's the appeal of natural stone for worksurfaces. Omega captures the authenticity of limestone and slate with its delicate colour palette. But it's the innovative surface textures that bring the designs to life, giving them a luxuriousness to envy.

exotic luxury

The allure of exotic woods is irresistible. Omega re-interprets nature's finest species to offer of the moment contemporary styling. The beautifully sumptuous olivewood, figured wenge and edgy stripwood designs are guaranteed to add design grace. What's more, their stunning visual appearance is enhanced by the sensuous ultramatt texture. This refracts the light beautifully giving an even colour tone the entire length of the worksurface. So it will feel every bit as luxurious as it looks.

Olivewood worksurface
and upstand

Noir Riven
worksurface

black is beautiful

Always. The unique colour that says smart, classic, glamorous or contemporary. Noir Riven takes black to a new design level. It combines the luxury appeal of black gloss, with a gently riven texture that's less high maintenance and more easy living.

The perfect design for those with uncompromisingly high standards.

Inspirational chic

Silverfrost is design and technical brilliance. An outstanding example of laminate innovation. And it's unique to Omega. We know our Brushed Aluminium splashbacks are a design favourite. So, we've developed the technology to produce a metallic design for use not just on splashbacks but also now on worksurfaces. With its gently shimmering surface it offers stunning visual and tactile qualities. And cleverly, it's totally practical for everyday use.

made to last

Quality

Manufacturing with the finest materials is what gives Bushboard worksurfaces their signature quality compared to competitive products. While beautiful and stylish to look at, they are also constructed to cope with the wear and tear of everyday living. They also have in-built antibacterial protection giving you extra peace of mind.

Independently tested to BS/EN438, your Bushboard worksurface is designed to withstand knocks, abrasions, chemicals, cigarette burns, steam, stains from juice, tea, wine or coffee. It is also highly resistant to heat, although we recommend the use of a protective pad as saucepan bottoms can become extremely hot.

Bushboard select E1 grade high-density particleboard for strength and stability. Its homogenous construction generates excellent machining capability for sink cutouts and mitre joints. They are surfaced in Polyrey high-pressure laminate. A resin impregnated moisture resistant barrier combines with Bushboard's unique 'Tekseal' cast resin to completely seal the underside against moisture penetration from everyday spills.

HiGloss Textures and Metallics

HiGloss texture needs a little more care and attention than our Surf and Fa textures. The HiGloss technology offers an advanced level of protection against scuffing, but don't forget this is a fashionable finish that can mark and scratch more easily with everyday use. To maintain the lovely HiGloss look, you should also buff up the surface to a shine after normal wiping down.

The metallic nature of the Silverfrost and Strass designs are also sensitive to heat so you should take care to use a protective pad. No chopping, cutting or placing hot items directly onto the surface please.

Lifetime Guarantee

Bushboard worksurfaces (except HiGloss and Silverfrost) are guaranteed for their lifetime. Bushboard will make good by repair and/or replacement (at its discretion) any Omega product of its manufacture which can be shown to have failed by reason of defects in its manufacture, that is subject to wear and tear, provided the product has been installed and used in accordance with the manufacturer's instructions and that the products are used for their intended purpose / application. Proof of date and place of purchase required. This guarantee is in addition to your statutory rights as a consumer and does not affect your rights in any way.

Care & Maintenance

Bushboard worksurfaces are so easy to maintain. Unlike other worksurface materials such as timber, composites or granites, they require no regular maintenance or repair. All you need to do is wipe them with a moist cloth and your favourite mild detergent. For more stubborn marks such as fruit juice or coffee, leave the detergent to soak on the surface for a little while before rinsing thoroughly. Obviously, your worksurface can become damaged if mistreated, so we recommend some sensible measures like placing hot pans or casserole dishes on protective mats and mopping up spills quickly. Full details can be found in our Care & Maintenance leaflet. One of these is included with every worktop purchased but if you need a copy please call our Customer Service Team or log onto our website.

Splashbacks

Splashbacks should always be installed at least 130mm from a hob or heat source. Please call us for our Splashback Installation Guide or visit www.bushboard.co.uk

made by Bushboard

Bushboard is the UK's largest independent manufacturer of worksurfaces. With a manufacturing history dating from the 1930's and more than 20 years experience in the production of premium worksurfaces, we are confident about the quality and the style statement our worksurfaces can make to your home. Continual investment, combined with real passion for our business, means we use the latest technologies and manufacturing techniques to keep our products at the forefront of our industry. So confident are we about their superior quality, that all standard Omega worksurfaces carry a lifetime guarantee.

We have an exemplary record in health and safety. Over the last two decades we have received consistent recognition from the industry-recognised RoSPA (Royal Society for the Prevention of Accidents) and BSC (British Safety Council), gaining many awards in the process.

We also take our environmental responsibilities very seriously. In the kitchen industry, we are proactive in encouraging smarter use of 3m and 4.1m worksurfaces to try and reduce over-specification of product when shorter lengths will do the job. It means less off-cuts and waste having to go to landfill. In the last 12 months alone continued investment in process technology has reduced our waste by 720 tonnes. We bale and recycle all our paper, cardboard and plastic and a further 300 tonnes of waste is burned to efficiently heat our factory.

As a large consumer of chipboard, we ensure that all our material carries the PEFC or FSC certification, guaranteeing that it comes from properly environmentally managed and sustainable sources. We have also achieved independent PEFC accreditation to provide surety for 'chain of custody'.
